

WARIOS[®] Software Suite

Digital transformation in operations management.
Your workflows digitally implemented.

WARIOS[®]cmms

Our **Computerised Maintenance Management** System systematically supports you in the planning, implementation and documentation of your maintenance and repair measures. Benefit from more than 30 years of experience in plant operation!

The system can be used for the planning, organisation and implementation of maintenance and servicing measures for **water management systems, incineration plants, industrial plants** and **medical technology**.

- WARIOS[®] is one of the few CMMS that takes spatial references for service objects and service units into account in the planning process by integrating geographical information systems.
- In addition, the system can already be used as the basis for Industry 4.0 revolution and for Building Information Modelling (BIM).
- Maintenance, inspections and repairs are planned and monitored in regards to orders.

OPTIMISE

GBM[®]4

If you manage area-related contribution and fee data, you've come to the right place. With our software for managing fees and contributions, you have the option of recording and optimally evaluating all property data.

**DAILY UPDATES
WITH GIS
DATABASE**

www.warios.de/gbm4

- We don't just process your area-related basic data in an industry model, but in an application developed specifically for this purpose.
- Extensive printing tools and comprehensive document management allow for continuous and traceable notification.
- The coupling of GBM[®]4 with various geographical information systems allows seamless implementation in your processes.
- Built-in future: Thanks to our client-server architecture, you can also use GBM[®]4 in your Home-Office.
- GBM[®]4 provides you with a complete historical representation of all data records - updated daily.

WARIOS[®]reports

Record, document and monitor operating data. Create reports and pass them on to external parties. With WARIOS[®]reports, which you can link to various SCADA systems, you can efficiently bring together all the data and information from your systems.

→ Connect WARIOS[®] reports to your Scada system and benefit from automatic data capture and transfer to your reports.

→ Create data entry screens for your employees or any number of reports in the form of daily, monthly and annual reports.

→ Leave it to WARIOS[®]reports to routinely generate reports based on the current data and according to your specifications.

WARIOS[®]kanal

A different kind of canal database - reduced to the essentials - but with all the relevant functions for operational management on board. This is WARIOS[®]kanal. Use our ISY-Bau-compliant database model and get to know our special key features!

ISY-BAU COMPLIANT
PLANNING
GIS COUPLING

- For damage assessments limit value violations are automatically excluded (database is kept redundancy-free)
- Use of a standardised database model according to ISY-Bau regulations
- Planning tools for flushing services, TV inspections and electronic sewer level available
- Support for various connections to geographic information systems
- Unique coordinate management with plausibility check
- Menu and toolbars replaced by a more modern ribbon bar
- Automated reading of ISY-Bau XML

We develop sophisticated software solutions with passion

Software solutions for recording, managing and evaluating large volumes of data. Our software solutions and services, primarily for the areas of commercial and technical plant management and public administration, offer you the opportunity to optimize work processes and minimize costs at the same time.

We are a team of passionate developers, consultants and system integrators. Our interdisciplinary, complementary skills result in sophisticated software solutions. With our effective tools our service and support consultants help you to solve your tasks fast and efficiently.

Provider for municipal and industrial water management

WTE Betriebsgesellschaft mbH Hecklingen (WTEB), a subsidiary of WTE Wassertechnik GmbH Essen, is one of Germany's leading providers of municipal and industrial water management services.

WTE Betriebsgesellschaft mbH
Gaensefurth 7-10 | 39444 Hecklingen
Phone (Germany only): 0800 9464260
www.warios.de

Within the WTE Group, WTEB, with its headquarters in Hecklingen, Saxony-Anhalt, is the company responsible for the operational management of plants in Germany and abroad and makes a significant contribution to the fulfillment of EU regulations, the safeguarding of general public services and health care, particularly in project-specific BOOT models.

We are responsible for the operational management of water technology facilities for more than 3.5 million people.
